

# Documentary Script Round 1.

*Our VO is open for interpretation.  
Whether it's mature and confident, surreal or intimate,  
youthful, accented, playful or weird – this is an empty canvas for you to paint  
This is a standard documentary style but is open to creativity!*

For more than three decades, mankind has explored the mysteries of the universe from a vantage point in space. Now we're turning space into a practical place to work. By the end of the year, NASA's space station is scheduled to give science a permanent platform in orbit; A place where researcher's can examine our world from a unique perspective and experiment under conditions of extreme temperature and weightlessness. In zero gravity, compounds can react in ways not possible here on Earth. Scientists can create better medicines, more durable plastics, and stronger alloys made of metals that resist mixing under gravity's pull.
