

## Documentary Script Grand Finale

### **ROARY DOCUMENTARY SCRIPT**

A new arrival lights up the Pride. Little Roary will be one of the largest carnivores and most powerful predators in Africa and the second largest species in the cat family.

Even heat cannot dull one of the cubs most driving urges, to feed. But Roary spends most of his day playing, which is serious business for baby lions; stalking each other, playing hide and seek and wrestling, till they collapse in a puddle of whiskers and paws.

With this they develop vital skills that they will use later in life when they have to hunt for themselves.

After two years their father will drive Roary away from the pride. While this may seem cruel, this is a very important instinct, which causes the father to do away with competition.

This action prevents inbreeding in the pride.
